Incorporated**ProTroller Series**

Two products in one

ProTrollers incorporate the ability to transform SmartTabs into trolling brakes with a flip of the lever handle. Move the handle up or down to switch between the most effective trim tabs in the market to the most effective trolling brake available.

In the vertical position the plates create equal braking on both sides of the boat. This not only reduces trolling speed by up to 35% but allows the boat to track straight even at the ultra low speed. Additionally steering control is not lost because the propeller is not restricted. The ProTroller series is a serious plus for Walleye fishermen.

SXPT9510-60-BL	9.5"x10" plates/60# actuators	16'-18'	44414 _T	229.99

As the boat speed increases, the water pressure also increases. Once the water pressure exceeds the actuator load rating the trim plates begin to move upward until they are horizontal with the bottom of the boat.

SMART TABS
SX**"Smart Tabs" SX**

Incorporates all the features of original Smart Tabs! Also provides durability with the no maintenance thermo molded co-polymer composite design. Tracking Ribs have been added to improve handling at higher speeds.

The StingRay Classic, Pro was inspired by the iconic shape of the StingRay Classic Series, but it has been technologically refined to enhance performance while minimizing installation effort. Featuring expansive wings that provide maximum lift and stabilization, the Classic PRO delivers exceptional holeshots without restraining top-end performance. With a StingRay Classic PRO installed, boaters will experience increased performance, and most importantly: a safer ride!
